Professional Summary

Aspiring Software Engineer, AI Developer, and System Architect pursuing a B.Tech in Artificial Intelligence and Data Science. Passionate about software development, artificial intelligence, cybersecurity, automation systems, and scalable technology architecture. Experienced in AI-powered applications, mobile solutions, and intelligent systems.

Education

Ramco Institute of Technology

B.Tech - Artificial Intelligence and Data Science
Expected Graduation: 2029
Current Status: Entering Second Year

Technical Skills

Software Development, Web Development, Mobile Development, Python, JavaScript, Git, GitHub, AI Fundamentals, Generative AI, Prompt Engineering, AI Research Agents, React Native, Computer Vision, AWS Concepts, Cybersecurity Fundamentals, Technical Documentation, Problem Solving, English Communication, Typing.

Projects

Lumini - AI-Powered Facial Recognition & Verification System

Facial Recognition, Liveness Detection, Offline Authentication, Local Encrypted Storage, AWS Synchronization Architecture, Lightweight Edge AI Deployment.

Project Zetra

Long-term technology initiative focused on Voice-First AI Systems, Cognitive Architectures, Local AI Environments, Memory Engines, Knowledge Engines, and Future Software Platforms.

Certifications

Microsoft Applied Skills, MongoDB Vector Search, NPTEL Python for Data Science (Elite), GUVI × HCL Certifications, HP LIFE Certifications including AI, Agile Project Management, and Cybersecurity Awareness.

Career Objective

To become a Software Engineer, AI Engineer, and Technology Architect capable of designing scalable intelligent systems that combine artificial intelligence, software engineering, cybersecurity, and human-centered innovation.
